

SILVER BULLET

THROTTLE BODY SPACER

1992-1999 BMW M3 (E36)
L6-3.0L/3.2L

FEATURES & BENEFITS

Billet Aluminum Construction

aFe's Throttle Body Spacers are constructed from 6061-T6 billet aluminum and precision machined for lightweight, high-strength, perfect fit and finish.

Serrated/Helix Design

The Serrated/Helix design creates air turbulence in the intake manifold. This turbulence increases the air pressure in the combustion chamber resulting in increased horsepower, torque and improved throttle response.

Installation is a Snap

This Silver Bullet Throttle Body Spacer uses all factory mounting locations providing stability and a hassle-free installation.
