

MAGNUM FLOW

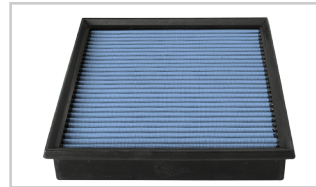

AIR FILTER

2014 TOYOTA TUNDRA
V8-5.7L

FEATURES & BENEFITS

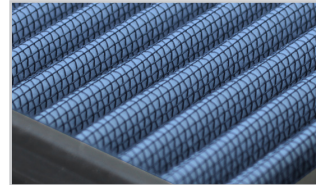

Urethane Housing

aFe Power performance air filters are constructed using 100% polyurethane on all four sides. This construction allows for proper OE-style fit with excellent filter durability.

Rounded Pleats

aFe Power air filters use a rounded pleat design that is 30% deeper to produce more usable surface area for increased flow and greater dust holding capacity.

Bump Seal

The pliable urethane bump seal conforms to even the most uneven housing. This design eliminates the use of gaskets or sealants and makes for a perfect filter fit and sealing surface every time.
